Dr, E. L. Tatum
Sixth International Congress of Biochemistry
Office of the Secretariat
9650 Wisconsin Avenue
Washington 14, D. C.

Dear Ed:

Your suggestion is a fine one, I certainly would be pleased to have Bruce Carlton (now at Yale - Biology) present the work of my group. He could discuss colinearity of gene structure and protein structure and most of the material on protein structure would be his own. He was with me as a postdoctoral for three years.

If you like, you could list the talk on the program as Carlton and Yanofsky to better identify the group and the system studied. If this arrangement is acceptable let me know and I will contact Carlton, unless you could do it yourself.

I'm sorry I can't give the talk myself. I'm tentatively planning to work in La Jolla this summer.

With best regards,

As ever,

Charles Yanofsky
